

ROBERT DOWD

Business Strategy & Operations | AI | Healthcare Technology | MBA Candidate (CU Boulder, Spring '27)
rdowd006@gmail.com | robertjdowd.com | [LinkedIn](#) | [Google Scholar](#)

PROFESSIONAL SUMMARY

Strategic leader with 11+ years partnering with C-suite executives to turn data and analytics into operating decisions, scalable platforms, and high-performing teams. Consistent track record of entering ambiguous, underdocumented environments and building the organizational clarity — frameworks, governance, and cross-functional alignment — that drives measurable business outcomes. Deep expertise across data strategy, AI/ML use-case prioritization, BI architecture, and operational program management in digital health. Published researcher (84 citations), co-inventor on 6 patents, and MBA candidate.

PROFESSIONAL EXPERIENCE

[View detailed case studies →](#)

Cylinder Health (Vivante Health) Denver, CO

Current

Data & Strategy Leader (Data Platform Architect)

- **Executive analytics partner** to CEO, SVP Operations, CMO, and functional Directors; translate data, analysis, and strategic recommendations into weekly operating decisions on retention, growth, and resource allocation.
- **Lead data-enablement strategist for Operations:** embedded alongside SVP of Operations to diagnose data gaps, establish reliable data management practices, and drive execution of enterprise ops strategy across Member Marketing, Member Services, and Client Success.
- **Program-managed a 2-year enterprise data transformation:** redesigned warehouse architecture around a new identity-management system, established governance, and built a governed analytics layer — acting as internal consultant to non-technical stakeholders with no upstream data contracts or requirements from engineering. Reduced monthly data pipeline costs 50% through structural redesign and query optimization.
- **Ownership of retention & engagement measurement strategy:** led end-to-end design and execution of a proprietary member engagement index — diagnosed measurement gaps, defined KPIs from first principles, and partnered with Marketing and Member Services to integrate the framework holistically across the member journey.
- **Driving KPI strategy across Marketing, Member Services, and Operations:** defining ROI frameworks, operational excellence metrics, and data-backed performance standards; serving as DS, DE, AI/ML, and Analytics SME for non-technical leadership.
- **Scaled infrastructure to support 2x client growth** (10–15 to 30+ enterprise clients) while reducing storage and compute costs ~20% through platform redesign and roadmap alignment with product and engineering.
- **Co-designed and prioritized the company's AI/ML strategy:** identified high-value use cases, supported build-vs-buy vendor evaluations, and helped establish investment criteria linking AI adoption to measurable ROI.

Artemis Health Denver, CO

Aug 2022 – Nov 2023

Manager, Data Science

- **Built and managed a 6+ person data science team** (US and international); established hiring processes, operating model, and career development frameworks. Transformed the function from ad-hoc experimentation to roadmap-driven product delivery.
- **Owned the data science product roadmap** and cross-team engineering dependencies; sequenced delivery against business and client priorities, managed stakeholder expectations, and resolved cross-functional blockers.
- **Delivered 4 client-facing data products** — Social Determinants of Health Index, 5 chronic-condition risk-forecasting models, and a pipeline-wide anomaly-detection system — meaningfully improving client retention and satisfaction and contributing to 4–5 new enterprise client wins.
- **Reduced client-facing errors 80%** and eliminated 15+ hrs/week of manual QA across a 20-person team by redesigning the organization's quality assurance process through the anomaly-detection system.
- **Led enterprise innovation track** and delivered a half-day thought leadership workshop to 100+ benefits leaders, positioning Artemis as an industry authority.

Dexcom Inc. San Diego, CA

May 2019 – Jun 2022

Senior Data Scientist

- **Architected and led Dexcom's real-world evidence (RWE) program:** a multi-year cross-functional initiative aligning Clinical, Regulatory, Marketing, and Sales to build an evidence portfolio supporting FDA submissions and market expansion into APAC and Eastern Europe.

- **Scoped, designed, and delivered a patented AI-driven algorithm** for personalized diabetes care delivery — led cross-functional alignment from concept through patent submission, translating clinical requirements into a production ML system.
- **Represented Dexcom on international stages** — presented research and real-world clinical evidence at multiple global conferences (audiences of 100+), directly supporting competitive positioning and lead generation in new markets.
- **Published 3 peer-reviewed papers** (84 citations, h-index: 3); research operationalized by Sales and Marketing for competitive positioning and lead generation.
- **Developed churn and forecasting models** that directly informed commercial strategy and product roadmap decisions at the business-unit level.
- **Served on PRIDE ERG executive board**, leading audit and redesign of talent-acquisition processes.

Beatport, LLC Denver, CO
Data Engineer

Oct 2018 – Apr 2019

- **Designed and launched the company's first data science recommendation engine**, translating raw user behavior into personalized product discovery at scale; built and maintained core data pipelines supporting customer experience across the platform.

University of Rochester Rochester, NY
Research Data Analyst

May 2015 – Jan 2017

- **Designed and executed quantitative research projects** using Python and SQL-based statistical analysis, contributing to published neuroscience studies and a grant-funded research program.
- **Presented research findings to faculty, clinical stakeholders, and academic conferences**; developed early competency in translating complex analytical outputs into accessible narratives for non-technical audiences.
- **Earned Honors Distinction in undergraduate thesis** — the foundation of a research and publication track that grew to 84 citations and 6 patents.

EDUCATION

University of Colorado Boulder, Leeds School of Business — MBA Candidate (Expected May 2027)

University of Rochester — B.S. Computational Neuroscience (2015), Honors Distinction in Research Thesis

Galvanize — Data Science Immersive Bootcamp, Denver, CO (2018)

CORE COMPETENCIES

Leadership & Program Management: Team Building & Mentorship, Cross-functional Program Leadership, Stakeholder Management, Executive Reporting, Roadmap Development, Hiring & Talent Development, Workshop Facilitation

Strategy & Operations: Enterprise Ops Strategy, Operational Strategy, AI Strategy & Use-Case Prioritization, Change Management, Process Design & Automation, Build-vs-Buy Analysis, Cost Optimization, Go-to-Market Support

Data & Systems Design: Data Warehouse Architecture, Analytics Layer Design, KPI & Metric Framework Development, Data Governance, Integration Strategy, Pipeline Architecture, BI Strategy, Looker

Commercial & Finance: ROI Analysis, Forecasting, Unit Economics, Sales Enablement, Client Acquisition & Retention, Competitive Positioning

Technical: Python, SQL, GCP, MLOps, ETL/ELT Pipelines, LLMs / GenAI, Scala

PUBLICATIONS & PATENTS
